

ADEKOLA DAVID

Full Stack Developer & Operations Specialist

Lagos, Nigeria | 09013303272 | adekoladavi2401@gmail.com | adekola-david.vercel.app

PROFILE

Full stack developer and operations specialist with experience spanning IT systems administration, automated workflow architecture, and end-to-end web application development. Skilled at bridging operational and technical demands — designing ticketing systems, telematics interfaces, and inventory platforms that combine reliable backend architecture with intuitive UI/UX. Comfortable working across the stack: from RESTful and GraphQL API integration and state management to interface design, with a growing specialization in Go, Dart/Flutter, and C# for API consumption and architecture navigation.

EXPERIENCE

Operations Specialist & UI/UX Designer

2025 – Present

Trucksoft

- Design and manage operational systems, support ticketing interfaces, and automated data tracking workflows to bridge complex logistics operations with intuitive user experiences.
- Automated Ticketing & Workflow Architecture: Built a centralized, automated ticketing dashboard using Next.js to replace manual operational tracking, wiring the frontend client to consume custom API endpoints for real-time ticket status updates and telemetry.
- Telematics Data Interface: Developed a dynamic UI to visualize localized telematics and geographic data points, utilizing strictly typed data structures to handle large, complex JSON payloads without UI latency.
- Built an internal inventory management web app for a logistics and telematics company, allowing the support team to track physical IT devices and SIM cards — managing stock levels, assignments, and history across operations.

Digital Strategy Intern

2023

Africa Hyperscalers Media

- Managed end-to-end digital content strategy and community growth for Africa Hyperscalers Media within the tech infrastructure ecosystem, as an intern.

System Administrator

2022 – 2023

TIC LMS

- Co-managed and maintained the TIC LMS platform, ensuring seamless access to educational content and supporting a smooth user experience for students.

PROJECTS

Stockr — Next.js, Supabase, Tailwind CSS

- Architected an end-to-end inventory and operations solution with secure authentication, real-time databases, and responsive, mobile-friendly design.

Company Tickets — Next.js, Supabase, Tailwind CSS

- Architected an end-to-end automated ticketing and workflow management solution, focused on secure authentication, real-time databases, and responsive design.

Sim Tracker — Flutter, OCR

- Built a Flutter mobile app for Nigerian users to scan data purchase receipts, extract information via OCR, and manage data subscriptions.

EDUCATION

SKILLS

Core Languages: TypeScript, JavaScript, HTML, CSS

Expanding Stack: Go, Dart, Flutter, C# (API consumption & architecture navigation)

Frameworks & Libraries: React.js, Next.js, Tailwind CSS

Infrastructure & Tools: Git, GitHub, Vercel, VS Code, Supabase

Specialities: UI/UX Architecture, Automated Ticketing Systems, Telematics Mapping, State Management, RESTful/GraphQL API Integration
